

Alabama Fire College
Rescue Technician: Rope
 Performance Evaluation Grade Sheet

Name: _____ Fire Department: _____

Address: _____

Training Location: _____ Date Started: _____

This Performance Evaluation Grade Sheet is to be used in conjunction with the Alabama Fire College Rescue Technician: Rope Performance Evaluation Sheets. These skills meet all the skill requirements of NFPA 1006, *Standard for Rescue Technician Professional Qualifications*, Chapter 6, 2003 edition. The evaluator for these skills can not be the instructor.

While we encourage all students to perform each listed skill, we realize that time and equipment constraints and the nature of the scenario required for the skill may limit students to certain roles within that skill. Therefore, students are allowed to pass a skill if the evaluator determines they actively participated in or observed each step of the skill. Denote in the appropriate column if the student participated or observed the skill.

Please submit a Performance Evaluation Grade Sheet for each student in your class to the test proctor. The individual Performance Evaluation Skill Sheets may be kept for your own records. Students must receive a passing grade on all skills in order to receive Rescue Technician: Rope certification.

Skill	Primary Task	Participated/ Observed	Pass/ Fail	Student Initial	Evaluator Initial
6-1	Construct a Multiple-Point Anchor System				
6-2	Construct a Compound Rope Mechanical Advantage System				
6-3	Construct a Fixed Rope System
