DESCRIPTION

This course is based on NFPA 1072: Standard for Hazardous Materials/Weapons of Mass Destruction Emergency Response Personnel Professional Qualifications. Designed for the student already certified/trained at the Hazardous Materials Awareness and Operations level; this course develops the skills already learned and provides in-depth training in the mitigation of hazardous materials incidents. Through both classroom and practical training, the student becomes familiar with health and safety issues, incident management, hazard and risk analysis, personal protective clothing, offensive response objectives (containment techniques), and decontamination.

STUDENT LEARNING OBJECTIVES

- Analyze a hazardous materials incident to determine the magnitude of the problem in terms of outcomes.
- Plan a response within the capabilities of available personnel, personal protective equipment, and control equipment.
- Implement the planned response to favorably change the outcomes consistent with the organization’s standard operating procedures and safety considerations.
- Evaluate the progress of the planned response by evaluating the effectiveness of the control functions.
- Terminate the incident.

CERTIFICATION REQUIREMENTS

To be issued certification, the candidate will: provide documentation of prerequisites, complete required training hours including skills training, successfully complete the cognitive written exam, and successfully complete the practical exam.

ACCREDITATION

Alabama Fire College and Personnel Standards Commission maintains accreditation with Pro Board and IFSAC. Each student will automatically receive national registration and certification upon successful completion of all requirements for certification.
