Emergency Planning/Preparedness

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.10, 2014

Skill Sheet – INSPI - 16

Given field observations, copies of emergency plans, and records of exercises, the candidate shall verify that emergency planning and preparedness measures are in place and have been practiced, so that plans are prepared and exercises have been performed in accordance with applicable codes and standards and deficiencies are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction.

Expected time to complete skill(s) is 20 minutes

Performance Steps	Test		Retest	
Safely performs the following steps:	P	F	P	F
1. Verifies that an emergency preparedness plan is in place				
2. Reviews written plan as it applies to codes and standards				
3. Reviews documentation of emergency plan exercises				
4. Uses field observations to confirm emergency preparedness				
5. Identifies the document deficiencies in the emergency plan according to policies of the jurisdiction				
6. Reports deficiencies according to the policies of the jurisdiction

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.16, 2014

Skill Sheet – INSPI - 23

Given the provided learning activity and water supply data, the candidate will verify fire flow for a site, determine flow results and graph them accordingly on the paper provided in order to determine available fire flow in GPM at 20 psi residual pressure. The candidate will verify that flow results are in accordance with the applicable codes and standards where any deficiencies should be identified, documented and reported according to agency and procedures.

Expected time to complete skill(s) is 20 minutes

8performance Steps	Test		Retest	
Safely performs the following steps:	P	F	P	F
1. Determines which GPM scale should be utilized				
2. Locates and plots the static pressure on the vertical scale at 0 GPM				
3. Locates the total water flow measured during the test on the chart				
4. Locates the residual pressure noted during the test on the chart				
5. Plots the residual pressure above the total water flow measured				
6. Draws a straight line from the static pressure point through the residual pressure point on the water flow scale				
7. Reads the GPM available at 20 psi residual and records the figure				
8. Identifies deficiencies, documents and reports in accordance with policies and procedures of the jurisdiction

Fire Flow Test Computation-Mathematical Method

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.16, 2014

Skill Sheet – INSPI - 24

Given the provided learning activity and water supply data, the candidate will mathematically convert the pitot pressure reading taken from the flow hydrant to gallons per minute using the fire flow formula $Q=(29.83) \times C \times d^2 \times \sqrt{P}$ and verify its appropriateness for the site given applicable codes and standards where any deficiencies should be identified, documented and reported according to agency policies procedures.

Expected time to complete skill(s) is 20 minutes

Performance Steps	Test		Retest	
Safely performs the following steps:	P	F	P	F
1. Identifies "C" (Coefficient of discharge)				
2. Determines "d ² "- Mathematically squares the actual inside diameter of the discharge orifice used during the flow test.				
3. Identifies " \sqrt{P} " mathematically				
4. Correctly determines "Q" in gallons per minute				
5. Identifies deficiencies, documents and reports in accordance with policies and procedures of the jurisdiction
