Rescue Technician: Confined Space I

Skill Sheet RT: CSR I - 1

The candidate, given monitoring equipment, reference material, personal protective equipment, accurately calibrated detection and monitoring equipment and size-up information, shall conduct monitoring of the environment, so that a representative sample of the space is obtained, accurate readings are made, readings are documented, and effects of ventilation in determining atmospheric conditions and the conditions of the space have been determined for exposures to existing or potential environmental hazards.

Expected time to complete skill(s) is 25 minutes

Performance Steps	Test		Retest	
	P	F	P	F
Safely performs the following steps:				
1. Confirms calibration of monitoring/detection equipment				
2. Obtains a representative sample of the space – CRITICAL POINT				
3. Makes accurate readings and documents				
4. Effects of ventilation in determining atmospheric conditions and the conditions of the space have been determined for exposures to existing or potential environmental hazards				
Candidate must successfully perform 3/4 steps including ALL CRITICAL POINTS	Score: __/4		Score: __/4
