CRITICAL CARE ACADEMY

The Critical Care Academy serves as:

- preparation for the International Board of Specialty Certification (IBSC)'s Flight Paramedic Certification (FP-C) test
- preparation for the preparation for the IBSC's Critical Care Paramedic (CCP) Certification test
- a refresher for those already certified as FP-C
- an NREMT paramedic refresher course
- 100-hour Critical Care Academy course (a \$500 value!)
- 4-day/45-hour in-person class with study guide (a \$360 value!)

About the course: The Critical Care Academy can be completed at the station or in the comfort of your home. The coursework is crafted as a distance-learning class and followed up with an in-person 4-day prep class. Registrants must be self-motivated to complete the coursework, including tests, to build a solid foundation prior to prep class. This 100-hour course is accredited by the Commission on Accreditation for Prehospital Continuing Education (CAPCE). It includes podcast episodes, case studies, and real-world knowledge to prepare you for the FP-C test administered by IBSC. The course begins on April 8, 2024. Registration is \$550, which includes course material for two years and reserves a seat at the in-person 4-day prep course.

About the prep course: This 4-day prep class will satisfy the IBSC 45-hour approved refresher course for FP-C and CCP-C recertifications, as well as 45-hour of Continuing Education credit approved by CAPCE and the California Board of Registered Nursing. The prep class will be held on August 22-25, 2024 at the Alabama Fire College in Tuscaloosa, Alabama. Students are encouraged to attend in person, but will have the ability to livestream the prep course.

REGISTER ONLINE

Class size will be limited.
