

Confined Space/Rope Rescue Technician

Now hiring rescue technicians:

We are seeking active rescue professionals to work on short-term and long-term projects in industrial settings in eastern TN and surrounding states. Current preference given to individuals with confined space rescue and rope rescue certification and experience.

Duties and Responsibilities:

As a member of our rescue team and staff, you will be responsible for providing various safety and rescue services for the company and for regional clients. Common duties include but are not limited to:

- Executing non-entry and entry rescues following established procedures and plans.
- Driving and/or hauling necessary trucks, trailer, and vehicles to and from job sites.
- Maintaining equipment, following and enforcing processes related to rescue materials.
- Providing First Aid/CPR as needed
- Helping the client assess potential confined space hazards and establishing safe work practices.
- Assisting with the development of rescue preplans.
- Developing relevant hazard controls and emergency contingency plans.
- Conducting air quality sampling.
- Reviewing confined space and other applicable work permits.
- Carrying out safe work briefings with the client and contract workers.
- Performing work area inspections and stopping any unsafe work activities.
- Attending client meetings and briefings.
- Writing detailed reports on performance and productivity after each job.

Qualifications:

Must currently hold or be able to obtain all required training and certifications. Training qualifications include but are not limited to:

- Confined Space Entry and Rescue
- High- and Low-angle Rope Rescue
- Fall Protection
- Personal Protective Equipment
- Respiratory Protection
- Incident Command Systems
- OSHA 10-Hour Outreach
- First Aid/CPR/AED

Don't have these qualifications yet?

Not a problem. We offer training to eligible candidates.

Physical Requirements and Working Conditions:

Our rescue team members work in industrial environments such as nuclear power plants, ethanol refineries, manufacturing facilities and the like. This job may require you to work indoors, outdoors, in small spaces and/or at heights. Rescue team members must be able to physically climb, lift, use proper equipment and work at heights and/or in confined spaces.
